TRANSPORTABLE

CRYOACTION

Available in Nitrogen & Electric

Overview of the Transportable

- Innovative, all in one Cryotherapy solution
- -60°C pre chamber with main chamber reaching as low as -160°c (sytem type dependant)
- Easy to operate, intuitive interface
- Available in Nitrogen and Electric
- Safest whole body cryotherapy chamber on the market

Why Choose Our Transportable Chamber?

CryoAction's transportable cryotherapy system is a unique proposition, combining a full sized cryotherapy chamber, a changing/waiting area and a separate technical room.

Designed to be installed externally, often adjacent to gymnasiums or changing areas. The cryochambers are used where internal space is restricted or construction of new facilities is to take place in the future and a temporary cryotherapy solution is required.

The unit is built with a prefabricated structure consisting of a vestibule and the actual chamber, where the walls are filled with thermal isolation.

Chamber Type	Width (mm)	Depth (mm)	Height (mm)
CRYODUO 2	2900	6000	2900
CRYODUO 4	2900	6000	2900
CRYODUO 6	2900	7000	2900
